

THE ART OF

THE ART OF SUSTAINABILITY

SUSTAINABLE ECO-FRIENDLY CORK COLLECTION

ORI

The beautiful Mediterranean and Iberian regions of the world can be thanked for producing the natural material, cork. Cork comes from the Cork Oak trees which can live up to 300 years in these areas. Its characteristics of being fire-retardant, buoyant and impermeable make it well suited for many uses.

Thousands of years ago, the Ancient Romans and Greeks used it to make sandals and fishing net floats. Later, it was also used to insulate homes and as a soft flooring cover. The most common use is wine bottle stoppers, which is quite convenient given the growing region's close proximity to famed European wine producing countries. Perhaps Mother Nature was a bit of a wine drinker herself!

USA MADE SUSTAINABLE RUGGED STEEL CUTS

Steel's hard, cold image is juxtaposed to the warm, soft appeal of natural cork, yet they have an important characteristic in common -100% sustainability. Both materials are recyclable and blend harmoniously. Choose a vertical or horizontal presentation to create a recognition piece that is edgy and eco-friendly.

SUSTAINABLE INDUSTRIAL

CK-2000-ST	\$153.00	\$145.00	\$138.00	(C)	9″W X 5.2″H

MATER

There is hardly a more beautiful and natural material than cork, yet it is one we have all probably taken for granted most of our lives. Cork is the phellem layer of the bark of the Cork Oak tree. It is extremely lightweight due to its honeycomb structure full of empty cells, which is also what allows it to float. This is also what gives it flexibility and certain softness with a suede-like feel.

Cork is generally used in its natural state of a light brown or sandy beige color. It can take on natural oils and stain to achieve richness while still retaining its intrinsic charm. Visions captures the beauty and characteristics of cork to bring you an award collection that is unique, trendy and sustainable. This collection is a natural winner.

HEADS UP

A COMBINATION OF SOLID CORK & INNOVATIVE INLAYS

Heads Up makes an amazing desk accessory or award that is unique and natural. No matter how you roll, your imprint on a steel or coffee stained wood inlay always stays on top with this weighted cork sphere.

COFFEE STAIN

Deep within the forests, of remote locations in the world, grows the coffee bean. This truly amazing gift of nature is the origin of more than just your morning cup of coffee. Utilizing coffee as a wood stain makes a product that is green, fume and chemical-free.

Coffee brings forth the organic beauty of wood while enhancing its warm, caramel tones. This gorgeous, stained wood marries with cork from a combination of colors and textures that can only be created in nature. Natural wood with a natural stain... now that is organically beautiful.

ECO NATURAL RECOGNITION

ECO

Like all great works of art, cork doesn't happen overnight. To that point, the first harvest of cork does not happen until the tree is at least 20 years old and is only harvested every nine years. Specialized workers, known as extractors, carefully remove the cork and lay it to dry in the elements for months before it is ready for use. Harvesting the cork actually keeps the tree alive!

The harvesting of the bark causes no permanent harm to the tree. Therefore, the trees remain to protect the landscape from erosion and create a place of refuge for animals; many of which are on the verge of extinction, including the lberian lynx. All of this makes cork very sustainable, 100% eco-friendly and provides us with a functional, decorative material. So next time you pop open that wine bottle, stick a pin in the bulletin board or admire your gorgeous Visions' award, remember all the attributes cork has to offer.

NATURAL COFFEE STAIN CORK & WOOD DUO

BREVE

AN ASSEMBLY OF COFFEE STAINED WALNUT & SOLID CORK

As you dive into this deep, rich coffee-stained wood, accented with just the right amount of natural cork, it tells the story of sustainability and eco-friendly choices. This unique and natural hanging plaque offers a classic and sustainable award.

✤ ADD YOUR OWN RECOGNITION PINS - NOT INCLUDED

The cork, wood and coffee stain used in this collection are natural, making each piece unique. Material and imprint variations may occur.
