

HEALTH GUARD SHIELD

CLEANING INSTRUCTIONS

Please follow the instructions to ensure you properly maintain the look and quality of your Health Guard Shields.

BEST CLEANING LIQUIDS AND MATERIALS

Windex with ammonia is recommended.

A microfiber cloth would be recommended, however other products such as paper towels and rags can be used as well.

AVOID THE FOLLOWING CLEANING LIQUIDS AND MATERIALS

No pure alcohol, it will damage the acrylic.

Avoid alcohol use as much as possible on the acrylic.

Do not use any abrasives (ex. steel wool, scratch pads, etc.) as these will scratch the acrylic.

A heavy ammonia product may cause acrylic to cloud.
